ET51 Android Enterprise Tablet

The surprisingly rugged, thin and light tablet with integrated 1D/2D Barcode Scanner

When it comes to choosing a tablet for your business, your workers want sleek consumer styling, while you need enterprise-class durability, data capture and accessories. Now you can have it all with the Android™ ET51 Enterprise Tablet with integrated 1D / 2D barcode scanner, the thinnest and lightest Zebra rugged tablet computer. Your workers get a personal tablet that looks and feels just like their own, while you get a device family with the durability, ease-of-use, data capture capabilities and flexibility your business requires. Android provides instant familiarity, enabling rapid adoption and minimal training requirements — while Zebra's powerful Mobility DNA™ provides over a dozen highly valuable tools that boost business-class performance, ease-of-use, security and manageability above the competition. And all the right accessories make this compact 8.4 inch screen model easy to carry everywhere you work.

Built for All-Day Every-Day Business

Rugged and Ready to Use Indoors and Outside

Virtually nothing will stop this tablet — it’s built to handle drops to concrete and plywood, rain, snow, dust, extreme heat, subzero temperatures, spilled liquids and even a hose-down at full force. This ET51 model includes an ergonomically designed protective frame that provides a drop specification of 1.2 meters / 4 feet to concrete surfaces. The Corning® Gorilla® Glass display provides shatter- and scratch-resistance, protecting one of the most vulnerable components on any tablet.

Best-In-Class Brightness and Your Choice of Screen Size

With the ET51, you get class-best brightness that makes the ET51 the easiest to read tablet in virtually any lighting conditions — including bright sunlight. This compact, small and light 8.4 inch model is ideal when size and weight are most important.

Advanced Touchscreen Technology

The high resolution screen delivers sharp text and clear graphics for superior readability. The touchscreen works with a finger — even with a glove — or a passive stylus for more precision. And even if the display is wet, every input mode works.

The Fastest Wireless Connections Wherever There’s a Hot-spot

Multiple features boost WiFi network capacity, speed and range for unprecedented WiFi performance. 2x2 Multi-User, Multiple Input, Multiple Output (MU-MIMO) allows access points to communicate with multiple devices simultaneously and shifts processing from mobile devices to access points, extending battery cycle time. WorryFree WiFi delivers near instant application response times, unmatched roaming performance, plus exceptional voice quality and network diagnostics — everything you need to maximize WiFi performance and workforce productivity. Bluetooth 5.0 delivers twice the speed and four times the range with less power compared to 4.x, so you can expect the best performance from your Bluetooth peripherals, including headsets and printers.

For more information, visit www.zebra.com/et5x
Perpetual 24x7x365 Battery Power
To power the longest of shifts, just add a second optional hot-swappable battery via the innovative expansion back to more than double the battery run time. The internal battery in ET51 is field replaceable when needed, extending product life cycle, increasing the return on your investment and protecting workforce productivity.

The Processing Power to Run Even the Most Demanding Apps
Get all the power you need to deliver superior application performance with the ultra-powerful 8-core processor.

Advanced Data Capture
Advanced Enterprise-Class Scanning and More
With the integrated SE4710 scan engine, you can scan 1D and 2D barcodes, getting the performance that sets the industry bar for enterprise-class scanning. PRZM Intelligent Imaging and advanced algorithms deliver first-time, every-time, fast capture of virtually any barcode, in practically any condition — damaged, dirty or poorly printed. For occasional scanning, the integrated 13MP rear-facing color camera captures high resolution photos, videos, signatures and documents.

Video Calls for On-The-Spot Help
The integrated 5MP front camera enables video calling over the WiFi or cellular network, allowing your workers to get instant help from a remote expert, co-worker or supervisor.

Customize Your Tablet with an Unmatched Accessory Family
The Most Charging Options
The unique ShareCradle provides space- and cost-efficiencies in the backroom by providing a common base to charge all your Zebra mobile computers and tablets — just insert the right cups for your devices in the charge bays. And docking station charging solutions offer three USB ports, Ethernet and HDMI, providing all the connectivity you need to use the ET51 as a desktop solution and more. It is also possible to charge the ET51/ET56 tablets via the side USB-C port when a simpler charging solution is needed.

Innovative Expansion Back to Add New Features
Simply replace the standard battery back with a compatible Expansion Back that adds a rotating hand strap and support for an auxiliary battery. The optional hot swappable battery can be added for around-the-clock power.

Mobile Point of Sale (mPOS) Support via Zebra Payment Expansion Backs
The ET51 8" tablet with integrated scanner also supports third-party payment expansion backs available from MTI to enable a fully mobile payment (mPOS) solution. Ingenico, Verifone, PAX and Miura payment terminals are supported, as well as magnetic swipe (MSR) and Smartcard reader options.

Simply remove the battery door cover from the ET51 and attach the Zebra Expansion Back to enable mobile payments on the ET51. These products are fulfilled through MTI.

Learn more about mPOS solutions on MTI's eCommerce site.

The Ultimate in Manageability and OS Update Simplicity
Get a Lifetime Security Guard for Android
With Zebra’s LifeGuard™ for Android™, you get the security updates you need to keep your Zebra Android devices secure every day they are in service.

Android OS Updates Made Easy
The update process for enterprise-class Android mobile devices is often time-consuming, costly, complex and difficult to track. With LifeGuard Analytics — free with your Zebra OneCare® Support contract — you can view available Android updates, their priority level and which devices are eligible for the update. You can automatically update devices over the air — and monitor the status of updates in real time. The result? Superior future proofing and a lower total cost of ownership.

The Ultimate in Value with Mobility DNA — Only From Zebra
Improve Ease-of-Use, Manageability, Performance, Security and Application Development Simplicity
Mobility DNA’s large family of applications makes Zebra Android devices easier to use. For example, easily track and find misplaced devices with Device Tracker. Identify device issues that can be repaired on site to eliminate needless trips to the Zebra Repair Center — and device downtime — with Device Diagnostics. Easily stage devices for use — including disabling any Google Mobile Services (GMS) that come standard with Android that may not be suitable for use in your business. Enable workers to use only the applications and device features you specify with Enterprise Home Screen. Create a customized onscreen keyboard that enables faster data entry with Enterprise Keyboard. And much more.

### Data Capture (continued)

#### Front Camera

| 5MP 1080p full HD optimized for video collaboration and low lighting conditions |

#### Video

| 1080p (Full HD, 1920 x 1080), frame rate = 30fps |

### Wireless Communications

#### WiFi (WLAN)

| WLAN: 802.11 a/b/g/n/d/h/i/k/r/ac; IPv4; IPv6; dual band 2x2 MIMO for transmit and receive |

#### Bluetooth (WPAN)

| Bluetooth v5.0 / 2.1+EDR Class 2 (Bluetooth LE) |

#### NFC

### Sensors

| Gyroscope | Maintains orientation based on principles of conservation of angular momentum |
| Motion Sensor | 3-axis accelerometer that enables motion sensing applications for dynamic screen orientation and power management |
| Ambient Light Sensor | Automatically adjusts display brightness, display backlight |

### Peripherals and Accessories

Accessories include: ShareCradles (4-slot); docking stations; single slot charge or charge/communication cradles; 4-slot optional battery charger; expansion back with accessories like the rotating hand strap and optional battery; passive stylus and USB-C charging

### Data Capture

| Scanning | Integrated SE4710 standard range 1D / 2D scan engine |
| Rear Camera | Image capture: 13MP auto-focus camera with user controllable LED flash, illumination and aiming; photographs, video, signatures and documents |

### Markets and Applications

#### Retail

- Inventory management
- Assisted selling
- Price verification
- Mobile Point-of-Sale
- Line busting

#### Field Service

- Mobile dispatch
- Work order management
- Asset tracking
- Maintenance/inspection
- Meter reading

#### Field Sales

- Route accounting/DSO
- Customer relations
- Pre-sales/order management
- Merchandising/survey
- Mobile payment

#### Warehouse and Distribution

- Warehouse and yard management
- Returns processing
- EDI transactions

#### Manufacturing

- Inventory management
- Supply-line replenishment
- Safety testing
- Maintenance/repair
- Compliance verification
- Receiving/put away/shipping

- **Footnotes**

1. The integrated rear color camera does not offer PRZM, Zebra’s advanced scanning algorithms or Intelligent Document Capture. Those options are only available on Zebra scanners that are integrated via the expansion pack and Zebra’s Bluetooth scanners, such as the RS6000 ring scanner, the CS4070 pocketable companion scanner and Bluetooth handheld scanners.
2. Support for future Android OS released past A11/R, are subject to Qualcomm validation.
